Genuine Epson I3200 E1 print heads

Compared with Epson DX5, Epson I3200 has almost doubled NPI, higher fire frequency, greater effective print width & smaller installation space, which enables faster printing speed and more heads on same size of carriage.

GZ Variable Dot Technology

GZ Variable Dot Technology delivers flawless skin tone, smoother gradient, crisp text and intricate detail without compromising speed.

Auto Capping & Wiping System

Auto Capping & Wiping System ensures excellent printing quality and maintains the print head. Improved cleaning process reduces the maintenance time and ink contamination.

Anti-collision unit

Anti-collision unit prevents the print heads from damage when the carriage is scratched by the media wrinkle or foreign objects.

Precise & adjustable stepping system

Serried pinch rollers, one-piece grit roller and pressure adjuster assure accurate and wrinkle-free media stepping for different thicknesses of materials.

Smart and efficient IR Dryer

Intelligent IR dryer works synchronously with printing, not only enhancing ink dryness but also saving energy and securing printing.
